Summary:

Full Stack Java Developer with 2.5+ years of experience, primarily focused on backend development using Java, Spring Boot, Microservices, and RESTful APIs for enterprise financial and banking applications. Experienced in application modernization, Spring Boot 4 migration, database operations, API integration, and security vulnerability remediation. Proficient in backend testing, dependency management, and application deployment using tools such as JUnit, Mockito, Postman, Maven, Git, and OpenShift. Possess basic knowledge of frontend development using HTML, CSS, and JavaScript, with an understanding of full-stack application development. Experienced in Agile/Scrum methodologies, code reviews, and end-to-end story ownership from requirement analysis to deployment.

Experience:

HCL Technologies – *Software Engineer*

Project (2): USAA — Financial Services (Insurance & Banking) & **Client:** USAA | February 2025 to Till Date

- Develop and maintain enterprise application components based on business requirements, owning development stories from requirement analysis through implementation and merge.
- Contribute to application modernization by migrating applications to Spring Boot 4 while preserving existing business functionality.
- Identify and remediate security vulnerabilities and SCA/Snyk alerts through dependency upgrades and compatibility validation.
- Develop, enhance, and validate backend services and RESTful APIs to support business requirements.
- Perform API testing using Postman and maintain test evidence in QTest.
- Create and review Merge Requests, address code review feedback, and support change requests through release and deployment.
- Troubleshoot application issues and collaborate with cross-functional teams in an Agile/Scrum environment.

Project (1): ECT to IRIS Migration & **Client:** USAA Bank

- Developed and maintained Java-based microservices supporting the migration of legacy correspondence services to the IRIS platform.
- Analyzed existing ECT service calls and identified impacted templates, dependencies, and integration points.
- Replaced legacy ECT/Hercules V1 service calls with IRIS REST API integrations.
- Configured and validated letter-generation functionality through API and UI-based testing.
- Collaborated with enterprise teams to validate migrated templates and enable IRIS feature flags across test and production environments.
- Supported application deployment, troubleshooting, and validation in OpenShift.
- Verified API responses and integration behavior using Postman to ensure reliable communication between services.

Infosys - *Software Engineer*

Project: Qatar Court Case Management System & **Client:** Mashreq Bank | Feb 2022 – Feb 2023

- Developed and maintained Java-based microservices to implement business requirements and support enterprise workflows.
- Built scheduled jobs and configured Cron-based processing for daily business operations.
- Implemented database operations using Spring Data JPA and maintained audit trails for database changes.
- Integrated backend services with IBM Business Automation Workflow (BAW) for instance creation, role movement, and final submission.
- Implemented JWT-based authentication to secure communication across microservices.
- Wrote and executed unit tests using JUnit and Mockito to validate application functionality.

Skills:

- **Programming Languages:** Java, SQL, JavaScript.
- **Backend Technologies:** Spring Boot, Spring MVC, Spring Data JPA, Microservices, RESTful APIs.
- **Frontend Technologies:** HTML, CSS, Basics of JavaScript & React.js / Angular.
- **Architecture:** Microservices Architecture, API Integration, Enterprise Application Development.
- **Persistence:** JPA, Hibernate, Spring Data JPA.
- **Databases:** MySQL, Oracle.
- **Security:** JWT Authentication, SCA/Snyk Vulnerability Remediation, Secure Dependency Upgrades.
- **Testing Tools:** JUnit, Mockito, Postman, QTest.
- **Build & Version Control:** Maven, Git, GitLab, GitHub, Branching, Tagging, Release Management, Merge Request Creation and Review.
- **Deployment & Runtime:** OpenShift, WebSphere Application Server.
- **Development Practices:** Agile/Scrum, Code Reviews, CI/CD , Change Management, Application Modernization.

Education:

Bachelor of Technology (B.Tech): Computer Science and Engineering.
College: Indur Institute of Engineering and Technology.
Percentage: 73%
