Saimani Veerabathini

Software Engineer | Java backend developer | +91-8341847724

veerabathinisaimani2624@gmail.com | LinkedIn | GitHub

Summary:

Java Backend Developer with **2.5+** years of experience building and maintaining Spring Boot microservices and RESTful APIs for enterprise financial and banking clients. Hands-on experience with application modernization, Spring Boot 4 framework migration, and security vulnerability remediation. Comfortable owning stories end-to-end — from requirement analysis through testing, code review, and deployment on OpenShift.

Experience:

HCL Technologies – *Software Engineer*

Project(2): USAA — Financial Services (Insurance & Banking)

Client : USAA | February 2025 to Till Date

- Deliver development and modernization stories for USAA applications, owning backend changes from requirement to merge.
- Lead Spring Boot 4 migration work, updating code and configuration while keeping business functionality intact.
- Fix security vulnerabilities and SCA/Snyk alerts by upgrading dependencies and validating that nothing breaks.
- Build, test, and raise Merge Requests, and support CR activities through release and deployment.
- Maintain QTest evidence and verify REST APIs with Postman.
- Work in Agile/Scrum, collaborate with the team, and keep everyone updated on progress and blockers

Project(1): ECT to IRIS Migration

Client : USAA Bank

- Developed and maintained microservices supporting migration; analyzed existing ECT service calls and identified impacted templates and integration points.
- Replaced legacy correspondence service calls (ECT/Hercules V1) with IRIS REST API calls; configured, validated, and tested letter generation using Postman and UI services.
- Collaborated with enterprise teams to verify migrated templates, enable IRIS flags in test and production, and supported deployment and troubleshooting in OpenShift

Infosys - *Software Engineer*

Project: Qatar Court Case Management System

Client: Mashreq Bank | Feb 2022 – Feb 2023

- Developed and maintained microservices based on business requirements; built schedulers and configured Cron jobs for daily processing.
- Implemented database operations using Spring Data JPA with audit trails for database changes.
- Integrated with BAW for instance creation, role movement, and final submission.
- Implemented JWT-based authentication across microservices and wrote unit tests using JUnit and Mockito.

Skills:

- **Programming:** Java
- **Frameworks:** Spring Boot, Spring MVC, Spring Boot 4 Migration
- **Architecture:** Microservices, RESTful Services
- **Persistence:** JPA, Spring Data JPA
- **Databases:** MySQL, Oracle
- **Build & Version Control:** Maven, dependency upgrades, Git, GitHub, branching, Merge Requests
- **Testing & Validation:** JUnit, Mockito, Postman, QTest
- **Deployment / Runtime:** OpenShift, WebSphere Application Server
- **Security / Maintenance:** SCA/Snyk remediation, vulnerability fixes, secure dependency upgrades, framework migration
- **Development Process:** Agile/Scrum, story-based development, code review, CR/change management

Education:

- B.Tech , Computer Science and Engineering Indur Institute of Engineering and Technology
